DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of group I in Paper No. 9 is acknowledged. The traversal is on the ground(s) that method is similar to the product by process claims. This is not found persuasive because the particulars of the method claims provided are not required in the product by process claims and require method steps that were not originally filed and therefore constituted a new invention as set forth in paper 7.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8, 3, 4, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Crandall. The patent to Crandall discloses the recited pipe member comprising a metal pipe 10 made of aluminum of a small diameter and longer than a second tubular portion 14 considered equivalent to a pipe section made of steel being of a larger diameter to fit over the smaller diameter pipe and of a shorter length, the two together form a pipe section, and the inner pipe is enlarged to provide at least a portion of only the multiple pipe structure to expand integrally.

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 3, 4, 8, and 9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Williams (969 and 225), Usui (888), and Austin disclosing state of the art pipe sections.
